User Manual for Face2Name

In Face2Name, you can detect, store and recognize the faces of you and your friends!

Installation Instructions

1) Download Face2Name (F2N) from the AppStore.
2) Ensure camera permissions are enabled.
   a) Open the Settings.
   b) Tap "Apps" under the Device heading.
   c) Tap "Permissions".
   d) Tap "Face2Name".
   e) Enable "Camera" permissions if applicable.

Usage Instructions

1) Tap "Face2Name".
2) Hold your Android device facing you. Please keep the device steady.
3) Wait for the red rectangles to enclose one or more recognized faces.
4) Remove any article of clothing that may obscure your eyes, nose or mouth. This items such as glasses, facial masks or fake mustaches.
5) For name entry:
   a) Tap any rectangle to freeze the picture and enable name entry. Type the name and press enter to store you or your friend's face in the database! Tap anywhere outside of the rectangle to go back to facial detection.
6) For name recognition:
   a) Tap the rectangle around any person who is already entered in the database. Their name should show. Please be patient; this may take several tries.
